Project Development Phase
Model Performance Test

Date	
Team ID	SWTID-2026-1809
Project Name	*Enforcing Mandatory Fields Using UI Policies and Migrating Changes with Update Sets*
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	ServiceNow forms are rendered properly with all required fields. Mandatory fields are visually highlighted (using UI Policies), ensuring users can easily identify required inputs.
2.	Data Preprocessing	UI Policies are configured to preprocess user input by enforcing mandatory conditions dynamically. Fields become mandatory based on user selections, preventing incomplete data submission.
3.	Utilization of Data Filters	Conditional logic (filters) is applied in UI Policies (e.g., if "Category = IT", then "Subcategory" becomes mandatory). Filters ensure context-based data validation.
4.	DAX Queries Used	Not applicable. This project does not use DAX queries as it is based on ServiceNow configuration (UI Policies and Update Sets), not Power BI or data modeling tools.
5.	Dashboard design	No of Visualizations / Graphs – 2 • Report showing number of records submitted with mandatory enforcement • Report showing update set migration status (success/failure)
6	Report Design	No of Visualizations / Graphs – 2 • Tabular report of UI Policy applied fields • Summary report of migrated changes across instances (Dev → Test → Productio
